

PeopleSoft to Oracle Fusion Cloud Transformation

**Modernizing
Enterprise ERP
with Oracle
Fusion Cloud**

A leading organization embarked on a PeopleSoft to Oracle Fusion Cloud transformation to modernize its ERP environment, streamline financial and supply chain operations, and establish a scalable foundation for future growth.

Bring IT On

The Solution

The transformation covered core Oracle Fusion Cloud Financials and Supply Chain capabilities, including:

- **Financials:** General Ledger, Accounts Payable, Accounts Receivable, Fixed Assets, and Cash Management
- **Supply Chain:** Manufacturing, Inventory, Order Management, and Procurement
- **Post-Go-Live Enhancements:** Account Reconciliation (ARCS) and Planning & Budgeting (PBCS)

Delivery Approach

The program followed a predominantly remote delivery model, with on-site engagement focused on critical milestones such as CRP and go-live activities. A structured, role-based training program was delivered through an LMS and aligned with UAT and cutover activities.

Business Impact

The Oracle Fusion Cloud transformation established a modern ERP foundation designed to improve process efficiency, strengthen financial and supply chain operations, enhance visibility, and support continued digital transformation.

Training & Enablement

- **Structured Curriculum :** Role-based training content developed for Core Financials and Core Supply Chain end users.
- **LMS-Delivered :** Training deployed and tracked through a Learning Management System for consistent adoption and completion visibility.
- **Aligned to Go-Live :** Training scheduled alongside UAT and cutover activities to ensure readiness at go-live.

Key Highlights :

- **PeopleSoft → Oracle Fusion Cloud**
- **Financials**
- **Supply Chain**
- **EPM**
- **Remote Delivery**
- **Role-Based Training**
